Quadruple Port Charging Station

PSM-QCS

FOR PLAYSTATION® MOVE

MIX & MATCH MOVE CONTROLLERS ON THE CHARGING BASE. ANY COMBINATION WORKS.

Keep your PlayStation® Move Controllers fully charged and ready to use, while also keeping everything organized in a stylishly elegant and modestly sized charging station. Because Sony's Move controllers (the Navigation Controller and the Motion Controller) have internal rechargeable batteries, operating the charging base couldn't be simpler. Simply place either Move Controller vertically in any of the four the ports (two entire pairs can be accomodated) and that is all. It really is that easy. The Quadruple Port Charging Station is powered by an AC adapter, which means not having to plug anything into your PlayStation® 3 Console and occupy a USB port, allowing your game session to be truly hassle free.

Features:
- Compatible with PlayStation® Move controllers
- Recharges the internal batteries in your controllers
- Powered by an included AC adapter
- Organizes your controllers while recharging them while not in use

Specifications:
- AC Adapter is 5V 1.5A
- LED lights illuminate red when PlayStation® Controllers is being charged
- LED lights on charge stand illuminate blue when either not in use or after a charge is complete
- The packaging includes 1 piece AC adapter
- The working current for charge station is 1500 mAh

**PS Move Motion and Navigation controllers not included*
